

Rob Higgins

Fullstack Software Engineer

Denver, CO · 424.299.9338 · higginsrob@gmail.com · linkedin.com/in/higginsrob · github.com/higginsrob · higginsrob.github.io

SUMMARY

Fullstack software engineer with 10+ years shipping production systems end to end. Early engineer at Vertebrae through Snap's acquisition, owning cloud infrastructure, microservices, SDKs, and merchant integrations. At Snap, tech lead for the AR Enterprise Web SDK (cross-cloud pub/sub, Three.js, Camera Kit). Most recently Head of Engineering at Panorama AI, managing data and platform teams behind LLM products in Python, React/Node, and cloud services.

EXPERIENCE

Panorama AI · Dec 2023 – Feb 2026 · Santa Monica, CA

Head of Engineering · Oct 2024 – Feb 2026

- Managed the data and platform teams powering Panorama's LLM and ML products: Python ETL services, PostgreSQL, JavaScript tag, event ingestion, and model inputs.
- Drove platform architecture and technical standards across the engineering org.
- Defined data architecture patterns that helped Panorama show LLMs could answer business intelligence questions reliably.

Lead Software Engineer · Dec 2023 – Oct 2024

- Built core infrastructure for predictive recommendation models and LLM-based business intelligence.
- Wrote the predictive recommendations widget in React, an embeddable component serving personalized product recommendations to Ashley Homestore shoppers.

Snap Inc. · Jul 2021 – Sep 2023 · Santa Monica, CA

Software Engineer · AR Enterprise Web SDK Tech Lead

- Tech lead for the AR Enterprise Web SDK team after Snap acquired Vertebrae.
- Built a pub/sub layer connecting Snap and Vertebrae backends across multiple cloud providers.
- Designed and built the ARES Web SDK: API, merchant integrations, event tracking, and experience templating.
- Built the ARES Camera Kit web experience, combining Snap Camera Kit with enterprise shopping and AR try-on flows.
- Built a Three.js 3D product viewer for interactive product exploration and AR placement.

Vertebrae Inc. · Feb 2016 – Jul 2021 · Santa Monica, CA + Remote

Senior Fullstack Software Engineer

- Early engineer at Vertebrae. Built the AR/VR e-commerce platform from scratch through the Snap acquisition.
- Owned most of the company's cloud infrastructure with Terraform, scaling to millions of users with Docker, serverless, and containerized microservices.
- Built event tracking and ingestion into PostgreSQL for analytics/BI, plus GitHub Actions CI/CD across all repos.
- Shipped AR/VR products and React/Node merchant tools including a 360° video player (2016), virtual try-on, 3D viewers, and QR-triggered native AR via QuickLook and Scene Viewer.
- Built the merchant SDK, ad-tech integrations, JS SDK distribution pipeline, and 3D model converter architecture; drove platform architecture decisions and supported the Snap acquisition.

SKILLS

System Design · Distributed Systems · Platform Engineering · AI / LLM · Machine Learning · Python · React / Node.js · JavaScript / TypeScript · PostgreSQL · Terraform · AWS / GCP · Docker / Kubernetes · Microservices · Event-Driven Architecture · CI/CD · SDK & Developer Tools · REST APIs · Data Pipelines / ETL · Technical Leadership

EDUCATION

Full Sail University
AAS, Recording Arts Technology
